

# Quattro - Basic construction and specification

## Model: 4-P urethane ball (Dual core, Double cover)

	R&A Standard	Specification
Diameter	Min. 1.68" (42.67 mm)	1.682"
Weight	Max. 1.62 oz (45.93 g)	45.0 ~ 45.90g
Compression	-	95
Dimple NR.	-	322
Construction	-	4-piece
Inner Core Material		Rubber compound
Outer Core Material		Rubber compound
Mantle Material		TPE (Thermoplastic Elastomer)
Cover Material		TPU (Thermoplastic Poly-Urethane)
Cover thickness		0.045"
Remark:		

### Construction

- A new, larger inner core maximizes compression energy while minimizing driver spin.
- Premium dual-core construction promotes more distance off your longer clubs.
- The fast TPE Mantle combines for unparalleled feel.
- Thin ultra-soft Thermoplastic Urethane Cover feels fantastic and generates shot-controlling spin.
- Suits players with a driver swing speed of 95 mph or above.

### Performance benefit:

- Consistent ball flight.
- Excellent short iron spin.
- Increased greenside control.
